

Academic Vocabulary

Define the following words on a clean sheet of paper. When you have defined all 47 words, turn it in for extra credit. YOU DO NOT HAVE TO DO WORD BOXES! This assignment is to be done in class and can be done over the course of the year.

1. active transport
2. passive transport
3. allele
4. alternation of generations
5. analogous structures
6. homologous structures
7. bacteria
8. ecological pyramid
9. biomass
10. energy
11. biomolecules
12. proteins
13. lipids,
14. nucleic acid
15. carbohydrates
16. body plan
17. cellular respiration
18. aerobic respiration
19. anaerobic respiration
20. fermentation
21. diploid
22. DNA fingerprint
23. DNA replication
24. DNA sequence
25. evolution
26. fungi
27. haploid
28. homeostasis
29. innate behavior
30. learned behavior
31. karyotype
32. Linnean classification
33. meiosis
34. natural selection
35. nitrogen cycle
36. organelles
37. nucleolus
38. Golgi apparatus
39. Endoplasmic reticulum
40. population growth curve
41. protein synthesis
42. protist
43. recombinant DNA
44. scientific theory
45. sex-linked trait
46. transcription
47. translation
