Brought to you by **Luidia**

Every day eBeam solutions from Luidia help students learn how to communicate and collaborate, help educators connect with all their students and help administrators work more efficiently.

K-12 Teacher

Turn whiteboard notes into class handouts instantly. eBeam supports note taking for students with special needs, homebound students or students absent from class. Allow students to work together on projects and then share their results. Use your eBeam system to communicate with parents by posting class notes on your school's Web site. Even add a data projector and share Web sites, presentations and education applications with your entire class.

Faculty

Capture your whiteboard notes and transform them into class handouts. Allow students and faculty to collaborate on projects and then share their results. Share web sites, presentations and demonstrate applications to your entire class. Use your eBeam system to enrich distance learning by capturing your class activity and posting it to the web. Take it with you and enhance your conference presentations.

Administrator

eBeam is at home in the conference room as much as it is in the classroom. Save meeting notes to your computer, so you can refer back to them anytime. Add to previous sessions and have a never-ending whiteboard. Use the free sharing feature to host meetings over the Internet and remote colleagues can keep up with what's happening on your whiteboard in real-time. Present dynamic PowerPoint slide shows using our unique "PowerPoint" tool palette that lets you move easily from slide-to-slide and annotate on the fly.

What is eBeam?

A light, portable, inexpensive device that you can attach to any whiteboard.

Connect eBeam to your PC or Mac and capture anything drawn on the whiteboard surface.

Simply add a data projector and turn the system into a powerful, yet easy to use, interactive whiteboard. It's all the power and versatility of a fully interactive whiteboard and presentation system—and it's mobile!
